

Neurobiologisches Montagskolloquium

Hertie Institute for Clinical Brain Research, Otfried-Müller-Str. 27, Room 2.310, 6 p.m.

PROGRAM

w i n t e r t e r m 2 0 1 6 / 2 0 1 7

-
- 17.10.2016** **Adina L. Roskies**
Department of Philosophy, Dartmouth College, Hanover
Neuroscience, free will, and responsibility
Host: Hong Yu Wong
-
- 07.11.2016** **Axel Hutt**
German Meteorological Service, Research and Development
General anaesthesia: Experimental phenomena and neural models
Host: Martin Giese
-
- 21.11.2016** **Marcel Brass**
Department of Experimental Psychology, Ghent University
Neuroscience and the human will
Host: Hong Yu Wong
-
- 28.11.2016** **Marla Feller**
Dept. Molecular and Cell Biology & Helen Wills Neuroscience Institute, UC Berkeley
Wiring up a circuit to perform computations: The development of direction selectivity
Host: Thomas Euler
-
- 05.12.2016** **Sarah Garfinkel**
Sackler Centre for Consciousness Science, University of Sussex
On interoception
Host: Hong Yu Wong
-
- 12.12.2016** **Randolf Menzel**
Fachbereich Biologie/Chemie/Pharmazie, FU Berlin
Honeybees sleep and improve their memory
Host: Albrecht Vorster
-
- 23.01.2017** **Marco Prinz**
Institut für Neuropathologie, Universitätsklinikum Freiburg im Breisgau
The myeloid side of the brain: Microglia and their sisters
Host: Maria Kukley
-
- 30.01.2017** **Freek van Ede**
Oxford Centre for Human Brain Activity, University of Oxford
Human brain oscillations during attentional filtering in perception and working memory
Host: Til Bergmann
-
- 06.02.2017** **Stephanie Westendorff**
Tierphysiologie, Institut für Neurobiologie, Universität Tübingen
Information coding in prefrontal cortex without biasing behavior
Host: Uwe Ilg
